Viral Limbani

Full Stack Developer — Backend Engineer

+91 97248 36155 virallimbani9033@gmail.com
Viral Limbani Github.com/viral-limbani

Professional Summary

Backend-focused **Full Stack Developer** with experience designing and building scalable web applications using **Node.js**, **Express.js**, **NestJS**, and **Angular.js**. Strong expertise in developing **RESTful APIs**, delivering **real-time systems** with **WebSockets** and **Socket.io**, and enhancing performance through **Redis caching** and efficient **database queries**. Experienced with **MongoDB**, **SQL databases**, and deploying services on **Google Cloud Platform**.

Technical Skills

Languages: JavaScript, TypeScript, SQL, HTML, CSS
Backend: Node.js, Express.js, NestJS, REST APIs, JWT Authentication, Microservices Architecture
Frontend: Angular.js, React.js
Databases: MongoDB, MySQL
Caching & Messaging: Redis, Event-Driven Architecture
Real-Time Systems: WebSockets, Socket.io
Cloud & DevOps: Google Cloud Platform (GCP), Cloud Functions, Cloud Scheduler
Tools: Git, GitHub, Postman

Professional Experience

Software Engineer — E2logy Software Solutions Pvt. Ltd. Apr 2025 – Present

- Built scalable backend services using **Node.js** and **NestJS**, supporting production-grade web apps.
- Designed and executed secure **RESTful APIs** for frontend communication and third-party integrations.
- Built modern frontend components using **Angular** and **React.js** for responsive web applications.
- Streamlined **MongoDB** and **SQL** queries, improving API response time and overall system performance.
- Enforced structured **error handling**, **data validation**, and modular backend architecture patterns.

Junior Software Engineer — Capermint Technologies Pvt. Ltd. Jan 2024 – Mar 2025

- Engineered scalable **multiplayer game backend services** using **Node.js** and **Express.js**.
- Designed **REST APIs** for player profiles, leaderboards, matchmaking, and in-game transactions.
- Managed **MongoDB** and **SQL** databases to store player data and persistent game sessions.
- Delivered **real-time communication** using **Socket.io** to support multiplayer gameplay and live game events.
- Boosted system performance through **Redis caching** and targeted database query tuning.

Software Engineer Intern — TatvaSoft Pvt. Ltd. May 2023 – Jun 2023

- Contributed to development of a **Angular.js** based platform, delivering reusable UI components.
- Enhanced **frontend performance** and improved cross-device UI responsiveness.

Projects

AI Virtual Assistant (MERN Stack)

- Built an AI assistant using **MongoDB**, **Express.js**, **React.js**, and **Node.js**.
- Integrated **Google Gemini API** to generate intelligent, context-aware responses.
- Exposed **REST APIs** for chat management and session persistence.
- Currently extending support for file and image uploads.

Real-Time Chat Application

- Engineered a messaging platform using **Node.js**, **Socket.io**, and **WebSockets**.
- Applied **event-driven architecture** supporting private and group chat functionality.

NewsPanda — News Platform

- Built a responsive news platform using **Angular.js** and third-party news APIs.
- Applied dynamic data rendering and streamlined UI performance for a smooth user experience.

E-Commerce Backend System

- Architected backend services using **Node.js**, **Express.js**, and **MongoDB**.
- Exposed APIs for product catalog, order management, and user authentication.

Education

Bachelor of Technology (B.Tech) — Computer Engineering
Charusat University 2024
CGPA: 7.94 / 10
